

Dealing with ectopic pregnancy is a challenging time

unusual bleeding
abdominal discomfort/pain
shoulder tip pain
bowel/bladder problems
missed/late period
pregnancy test positive
Collapse

Symptoms of ectopic pregnancy are similar to other conditions like miscarriage, or urinary infection, or upset stomach. If you are a woman or person capable of conceiving of child-bearing age, who is sexually active or having fertility treatment, and experiencing some or all of these symptoms, please seek medical attention as soon as possible.
